Rim Collection

10+ Architectural Shapes – Available in round, square, triangle, hexagon, oval, linear, and custom shapes.

Scalable & Modular – Use as single pendants, grouped multiples, or build flowing light systems using curved and linear sections..

Slim & Minimalist Design – Minimal profiles with seamless joining for uninterrupted uniform light.

Expanded Options – Rim Verso features outward distribution, in contrast to the inward distribution of the other collection luminaires. Also available: the sound-absorbing Rim Acoustix.

Rim Collection Expands

The Rim Collection continues to grow with the introduction of Rim Tube and Rim Mini—two distinct yet complementary additions. Together, they reinforce the Rim Collection's mission: shaping architectural spaces with creativity and performance.

NEW
TUBULAR
PROFILE

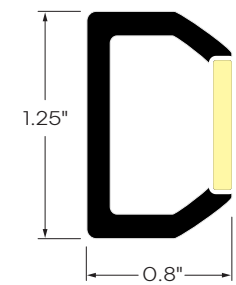

NEW

Rim Mini

At just 0.8" wide and 1.25" tall, Rim Mini maintains the design freedom the Rim Collection is known for.

Section View

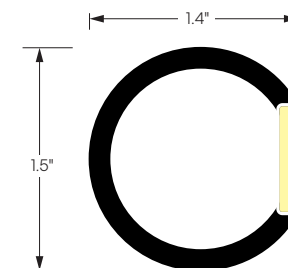

NEW

Rim Tube

Rim Tube is a minimal, tubular luminaire that scales from simple geometric shapes to sculptural, multidimensional installations.

From Subtle to Statement

Rim Tube

Rim Tube is not just a luminaire—it's a visual language.

Use it when you want lighting to shape a space, tell a story, or simply add quiet elegance without compromise.

NEW TO THE COLLECTION

Rim Tube

THE SHAPE OF REFINED EXPRESSION

The Rim Tube introduces a refined tubular form to the Rim Collection. With a minimalist 1.4" diameter, this versatile luminaire delivers bold expression through its clean geometry and striking illumination.

Rim Mini

SMALLER FORM. BOLD CAPABILITY.

Rim Mini is part of our Miniwerx Collection—a growing series of luminaires engineered to deliver full-scale performance in significantly reduced form factors. At just 1.25" tall and 0.8" wide, Rim Mini is more than 40% slimmer than the standard Rim profile. Rim Mini enables designers to create clean, precise lighting with a minimal visual footprint and maximum design flexibility.

One Collection. 4 Unique Profiles.

RIM MINI

Part of our Miniwerx Collection, Rim Mini introduces a compact profile to the Rim family—delivering bold geometry in a smaller footprint.

NEW

RIM

The original form. Timeless, clean, and instantly architectural—light shaped to perfection.

RIM TUBE

From simple geometry to sculptural compositions—our 1.4" tubular profile redefines what minimal can do.

NEW

RIM VERSO

Outward-facing illumination available in multiple shapes and scalable sizes—with an optional sound-absorbing version: Rim Verso Acoustix.

The Rim Collection grows with two new models.

The classic Rim is joined by a compact format—Rim Mini, a tubular version—Rim Tube, and a dramatic inverted-lens design—Rim Verso. Each carries the minimalist signature and elegance of the Rim Collection, unified by a shared design intent.

RGB+W

All Rim fixtures feature inward-facing optics. For outward-facing illumination, Rim Verso is available in both Round and Square models as part of the Rim Shapes offering.

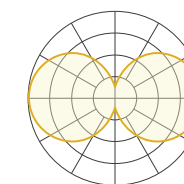

The Rim Collection delivers 90+ CRI for exceptional color quality and is available in Static White, Tunable White (Duo), and Dim-to-Warm (Sola). For dynamic lighting effects, RGB+W (Quadro) combines four-channel RGB with 3500K white.

Lumen output ranges from 500 to 28,800 lumens—suitable for both subtle ambient lighting and bold, impactful applications.

Rim Shapes

Linear

Rim Linear blends generous illumination with a minimal footprint. Its twin-rail extruded aluminum frame comes in five standard lengths—from 24" to 96"—and connects seamlessly to form continuous runs and rhythmic patterns. With output up to 10,800 lumens, it delivers both flexibility and performance.

Rim Multiple Round - 3 Rings
Ø 36" + Ø 48" + Ø 60, Pendant

Rim Multiples

Rim Multiples are playfully arranged in striking configurations that create powerful visual effects. Available in Round, Square, Hexagon, Triangle, and Rounded Square formats, each composition combines two or three fixtures of the same shape. Mounted on separate planes and unified under a single canopy, these sculptural groupings become bold focal points that elevate the space and the visual experiences within it.

Round	Square	Hexagon	Triangle	Rounded Square

Rim Segment & Patterns

RIM SEGMENT

Pre-configured Segment

Rim Segment is a standalone curved or linear luminaire available in open arc shapes or straight lines. It delivers sculptural lighting with architectural precision and can be used alone or in combination to create visual rhythm within a space.

- Available in quarter, half, or full circular arcs
- Round: 12"-48" radii
- Linear: 24"-144"

RIM PATTERN

Modular Pattern

A modular, continuous lighting system built from Rim Segments joined together—including linears and curves—to form custom geometries. Available as open shapes or closed shapes, the Rim System can be tailor to your design.

- Combination of linear and curved Rim Segments
- Curved Section: 12"-48" radii
- Linear Section: 24"-144".

Shapes		Dimensions								
1/4 Round - 60° - 90° - 120°		Ø 12"	Ø 18"	Ø 24"	Ø 30"	Ø 36"	Ø 48"	Custom Radius and Shapes Available

Rim Acoustix

THE SHAPE OF ACOUSTIC COMFORT

Noise-canceling and visually refined, Rim Verso Acoustix is the ideal pendant fixture for open offices—combining a sound-absorbing panel with a continuous ring of light. Rim Verso Acoustix is available in multiple colors to fit any interior design.

Design Details

The integrated suspension and power-over-cable provides an elegant mounting arrangement. Current from the driver to the LED array flows through seven-strand galvanized copper conductors.

A dielectric polymer coating insulates the cable which is supported by insulated holders at ceiling and luminaire mounting plate. Our standard integrated power-over-cable supports all available dimming and control options without additional conductors.

1 Hinged cable holder with concealed fee

2 Seven-strand galvanized copper conductors

3 Color coded terminal block for ease of connection

Our Greenwerx Initiative

At Lumenwerx, sustainability is at the very foundation of our Greenwerx Initiative, ensuring we prioritize eco-friendly practices throughout our operations, from product design to manufacturing.

We are committed to reducing our environmental footprint by utilizing energy-efficient materials, minimizing waste, leading upcycling projects, and using 100% renewable energy sources.

Our luminaires are environmentally responsible, meeting Red List Free or Red List Declared standards, with multiple Declare Labels published for transparency. Our products also conform to LEED and WELL Building Standard certification program requirements.

By integrating sustainability into every aspect of our business, we strive to create a brighter future for generations to come.
